Wildflyer

"Know thy enemy"

Sun Tzu 500 B.C.

"Know what a fire wants to do and what it can do"

Marc Castellnou, 2016 AD

REPSOL

CEPSOL

EPSOL

Wildflyer

Started January 2024

Supported by European Space Agency and FIRE-RES OIC

Used by 9 organisations across 6 countries.

Including SDIS13 / Waldbrandteam / DREAm / Hellenic FS

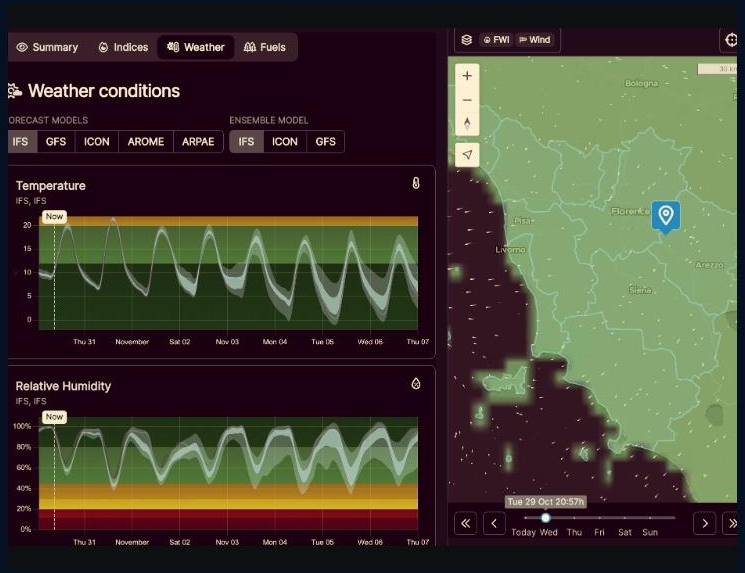
Problem

Wildfire managers don't have access to dedicated data infrastructure that fits their operational mission.

Example 1

"Making fire bulletins takes our team 10 hours of copy/pasting from 30 websites each week"

E.g. SpotWX, Windy, Météo-France, ARCGis, MeteoCiel



Wildflyer puts all your data in one place

Custom reports in minutes

50+ weather models; 3 satellite providers

Spend time analysing, not copy/pasting.

Problem 2

"We don't have access to <your index here>".

E.g. HDWI, NDVI

19 fire and fuel indices on Wildflyer

Professional graphs and maps

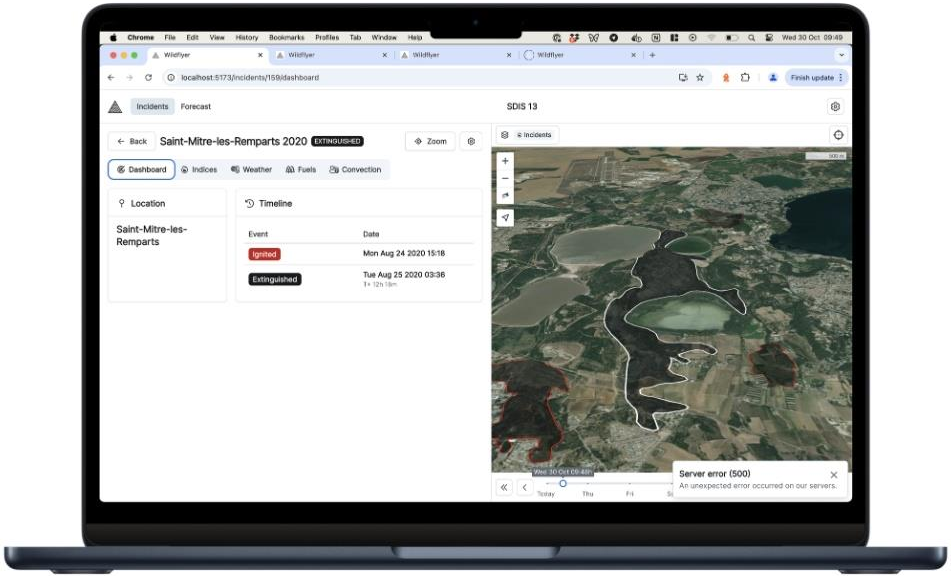
Exportable & Customisable

Index missing?

We build it with you in weeks, not years.

Problem 3

"We don't have the time to do extensive post-fire reporting.".



With Wildflyer: Burn scars for 85.000 fires in Europe since 2000

Reanalysis data, historical forecasts

All media (photos, videos) in one place

Vision

Open Wildfire Operating System

Where Innovators and Practitioners connect

Our values

Technology for **sensemaking,** not decision-making

Real-world needs of firefighters only

Open - integrate easily with other tools

A future where we can stand on each other's shoulders 🔥

Let's not keep developing in silo's

A platform that enables every team in the world to easily step into advanced Fire Analysis

Recap

- Gathering data for wildfires is hard
- Wildflyer connects existing data streams and algorithms to meet mission objectives

Shout-out

- Are you an innovator?
  Connect with us to explore joint value propositions.
- Are you a practitioner?
  Book your demo today!
